ChatGPT 3.5 ▾

**You**

I want to add TCXO_EN to the https://github.com/YukiWorkshop/sx128x_driver software. I think the changes are SX128x.cpp
In init add TCXO_EN(); at top of file
at line 1444, near reset add
void SX128x::TCXO_EN(void) {
 std::lock_guard<std::mutex> lg(IOLock);
 HalGPIOWrite(GPIO_PIN_TCXO, 1);
SX128x.hpp
in line 1033 add GPIO_PIN_TCXO to the enum
in line 1288 add virtual void TCXO_EN(void); What
are the github steps to make this change

**ChatGPT**

To make these changes to the GitHub repository
`https://github.com/YukiWorkshop/sx128x_driver`,
you'll need to follow these steps:

1. **Fork the Repository:** Go to the repository's page on GitHub (`https://github.com/YukiWorkshop/sx128x_driver`) and click on the "Fork" button in the top-right corner. This will create a copy of the repository under your GitHub account.
2. **Clone Your Fork:** Once you've forked the repository,
